

BRADFIELD COLLEGE MUSIC HALL

This 16 week project saw the upgrade of the 200sqm space with a new stage area featuring bi-folding doors, acoustic panelling and fixed seating for a 160 audience

An existing audio-visual system was replaced with a video wall, new speakers and stage lighting all controlled by a specialist audio-visual control desk at the rear of the hall

We also delivered the mechanical and electrical services, installed a new oak-engineered timber flooring, electric blinds to new windows and doors, and also new storage cupboards for instruments

This project was completed to a tight construction programme and in a live school environment. The site was fully segregated but shared access to the main school with students and staff

"It's been a fantastic project to work on really transforming what was quite an uninspiring space into something which hopefully improves the quality of learning environment for both students and staff."

Katie Baulch, Lewandowski Architects

"The site team were incredibly polite, always willing to go above and beyond and with an absolute focus on delivering on time and to the highest quality expectations, whilst minimising the disruption to the ongoing operation of the College and were a pleasure to work with."

Julia Bond, Capital Projects Manager, Bradfield College
